Professional Summary

Second-year IT Programming student with hands-on experience building and supporting software through academic projects and a 12-week co-op placement. Strong foundation in Python and JavaScript, with practical experience working with databases and applying core software design principles. Demonstrates analytical thinking, adaptability, and a structured approach to solving technical challenges. Comfortable collaborating in team environments and communicating technical concepts clearly to both technical and non-technical audiences. Interested in software development, systems administration, and data-focused roles, with continued exploration in cloud computing and artificial intelligence. Committed to developing reliable, well-designed solutions that create meaningful impact.

Technical Skills

Analytics & Data Tools: SQL, Python, data modeling fundamentals

Programming: Python, Bash, JavaScript, PHP, C, C++, C#, Java, Kotlin

Cloud Technologies: Azure, AWS, Microsoft Intune

Databases: MySQL, SQLite, MariaDB

Tools & Workflow: Git, Jira, Visual Studio, VS Code, Android Studio, IntelliJ IDEA

Testing & Automation: Unit Testing, Integration Testing, Automation Scripts

Soft Skills

Individual and collaborative problem-solving

Clear technical communication

Adaptability to new tools and technologies

Attention to detail in code and documentation

Professional and reliable work ethic

Experience

IT Intern (12-week Co-op)

Municipality of the County of Annapolis – Annapolis Royal, NS

May 2025 – September 2025

Reference: Ben Olsen (Manager of IT)

Reference: Carter Hazel (System Network Coordinator)

- Supported the transition from on-premises infrastructure to cloud-based services.
- Administered and deployed mobile devices through Microsoft Intune.
- Performed Windows Server and domain operations.
- Improved network reliability by auditing and cleaning up firewall rules.
- Troubleshoot technical issues through a ticketing system remotely and in person.
- Documented network and server connections to improve infrastructure visibility.
- Collaborated with IT staff to resolve challenges and enhance workflow efficiency.

Projects

S.I.R.E – Simulated Incident Response Environment

PROG3300 – Integrated Programming Project (Team of 4 – In Progress)

- Leading UI and frontend development, from planning layouts to implementing reusable components and shaping the overall user experience.
- Connecting frontend components to backend API endpoints using React.js and Node.js.
- Contributing to debugging, testing, and iterative enhancement of features.
- Managing Git workflows, including branching and pull requests (PR).
- Supporting software and project documentation, including technical doc files, feature descriptions, and updates that help keep the team aligned throughout the development.
- Participating in agile planning using Jira for sprint tasks and Git for issue tracking.

Education

IT Programming Diploma (2-Year Program)

NCCC – Centre of Geographic Sciences (COGS), Lawrencetown, NS

Expected Graduation: June 2026

High School Diploma

Bridgetown Regional Community School (BRCS), Bridgetown, NS

Graduation: June 2023
